Q1 ? — Pre-logbook sessions: was it all Session 1?

The logbook suggests the following events all happened in Session 1 (We Be Goblins! module 1). Is this correct, or were some of these in separate sessions?

- Licktoad Village / Chief Gutwad / Dares (Squealy Nord, Bull Slugs, Rusty Earbiter)
- Journey to the Kaijitsu Star shipwreck
- Lotslegs Eat Goblin Babies Many encounter (giant spider)
- Vorka the cannibal goblin boss fight

Also: Module 1 starts with goblins already at the village moot, not in a cage. The "kindergarten cage / level-0 start" detail is from player memory only — is this a GM modification or a misremembering?

“ Answer:

Q2 ? — GM notes events: which sessions?

The GM notes describe four pre-logbook events. Which sessions did these happen in?

- Village defense against skeletons after a shipwreck return
- Pig capture at Paddlefoot Farm (Squealy Nord)
- Overnight ogre attack at a farmhouse
- Fire-breathing pig capture (Princess Crackling)

Were these Sessions 2-5? Or were some of them part of Session 1?

“ Answer:

Q3 ? — 23.03.2024 Birdcruncher session: in-person only?

The Birdcruncher feast + Sneaky Scorch becoming chieftain session (23.03.2024) has no FoundryVTT record. Was this played entirely in person? What session number was it?

“ Answer:

Q4 ? — 6/29–6/30/2024 FoundryVTT segment: which session?

Large FoundryVTT activity block (Dream Spiders, Spider Swarm, ~350 log entries). Active: Sneaky Scorch, Shvub-Mah, Rrrahah Bäähh, Bubble Bomb, Princess Crackling. Does not match any named session log entry clearly. Was this a separate session? When and where was it played?

“ Answer:

Q5 ? — 10/20–10/27/2024 segment: was Shvub-Mah absent?

FoundryVTT shows combat with Pale/Joyous Hunting Spiders and the Animated Axe. Only Sneaky Scorch, Bubble Bomb, and Rrrahah Bäähh active — Shvub-Mah is not in the log. Was Shvub-Mah absent? Was this online or in-person?

“ Answer:

Q6 ? — 30.11.2024 Sandhausen: date correct?

The in-person Sandhausen session (Screech Sagg joins, Level 5, Astral Plane) has no FoundryVTT record. The date was corrected from 30.11.2025 to 30.11.2024 by the Creative Director. Please confirm: is 30 November 2024 correct?

“ Answer:

Q7 ? — "Pfingsten 2025": Pentecost or March?

Session log calls this "Pfingsten 2025" (Shalelu encounter + water cave/wereseal). FoundryVTT shows 3/15/2025. Pfingsten (Pentecost/Whitsun) in 2025 was June 8-9, not March. Were these two separate events? Was "Pfingsten" a mistake in the notes? Were they one session over two days or two sessions?

“ Answer:

Q8 ? — Thistletop loot session (5/27–6/8/2025): real session or just admin?

FoundryVTT shows loot table rolls, level-up feats, and a rest during this period. The next confirmed in-person session was Wrexen (10.03.2025 / 03.10.2025). Was there an actual play session in May–June 2025, or is this purely online bookkeeping between sessions?

“ Answer:

Q9 ? — Ameiko: found in Thistletop dungeon or in Sandpoint?

Session log places the Ameiko rescue after the Thistletop dungeon. It says "Sandpoint jail area" — implying travel to Sandpoint. Did the party travel from Thistletop to Sandpoint to free her? Or was she held inside the Thistletop dungeon itself?

“ Answer: Resolved by T3 session log — "Im Gefängnis ist Ameiko... hierher verschleppt" — she was in the Thistletop dungeon prison cells (D9), not Sandpoint. Betrayed by her brother Tsuto, kidnapped during the Sandpoint raid, transported to Thistletop. *confirmed — T3*

Q10 ? — "Lercon GM": who is this?

FoundryVTT shows "Lercon GM" entries at 10/3/2025 4:07 AM and 6/4/2025 8:26 AM. Both are maintenance/empty entries at unusual hours. Is this Christian using a secondary login, or a different person? No campaign relevance assumed, but worth confirming.

“ Answer:

separately in [Lore Conflicts & Canon Decisions](#).
